Retention	+20%	↑ Enhanced Loyalty
Efficiency	+25%	↓ Faster Production
Budget	-10%	↓ Cost Optimization

Situation

The Hollo Podcast faced challenges in scaling audience engagement and maintaining production efficiency amid increased competition in the digital audio space.

Solution

As Project Manager, I led the integration of Generative AI tools for listener data analysis and topic optimization, implemented predictive budgeting models, and automated content workflows. This ensured consistent project delivery and data-backed creative decisions.

Impact

The initiative achieved a 15% rise in listener engagement, a 20% boost in retention, and a 25% reduction in production turnaround time, while maintaining 10% under budget through strategic vendor management.
