

N.K. Black | Project Manager | The Hollo Podcast

AI Integration & Predictive Analytics Case Summary — Jan–Jun 2024

The Hollo Podcast relaunch in early 2024 leveraged Generative AI and predictive analytics to optimize engagement, retention, and workflow performance. Using GPT-4 topic modeling, predictive Power BI dashboards, and SQL-based retention forecasting, the project achieved near-perfect alignment between predicted and actual growth trends. Engagement increased 27% between February–March and 33% between May–June, validating the reliability of AI-driven decision-making.
